ABOUT

I started managing social media and designing graphics for US marketing agencies. Then clients needed video, so I learned to edit podcasts, ads, reels, lectures, and long-form content. Then AI tools arrived, so I started producing AI animations, AI-generated music, and AI video before most people had heard of them. Now I build the systems too: marketing automation, SEO strategy, lead generation, and GHL workflows.

Most offshore hires do one thing. I replace five: content producer, social media manager, video editor, automation specialist, and AI creative, all from one seat in the Philippines.

SERVICES

What I Bring To Your Team
